Anemostat manufacturing dimensions ±0.8mm  
Actual dimensions are nominal and may vary  
based on component manufacturers tolerances.

**STANDARD PRODUCT FEATURES**

- **MATERIAL:** 1.2 mm (18 GA) Galvanised Steel - Frame.  
.75 mm (22 GA) Galvanised Steel - Louver Blades.
- **FINISH:** RAL 9006 Silver Baked Enamel, Gray Primer, Beige or Bronze Baked Enamel
- **INSTALLATION:** Our top selling louver is preferred because of its ease of installation. Use #8 x 25mm (1") phillips screw that fastens auxiliary frame to the louver core, thru the cutout in the door, thus eliminating the need to drill holes in the door. This method saves time and installation labor and leaves the corridor side of the frame free of fasteners for added security, and a cleaner aesthetic appearance.

- **AESTHETICS:** Tight mitered corners, no visible welds, countersunk mounting holes and corridor side of frame free of fasteners make for a clean, streamlined appearance
- **USES:** Anywhere air flow is required thru a door.
- **FREE AIR FLOW:** 50% Free Area.
